The Regional Research Institute at West Virginia University conducts and promotes interdisciplinary research on the economic and social development of lagging regions. As a center of regional research excellence for more than four decades, the RRI has served as an internationally recognized center for the advancement of regional science – an interdisciplinary field at the intersection of geography, economics, and planning.

Our research focuses on theories and history of regional development, methods for studying regions, and policies for stimulating their development. We seek to advance our understanding of socioeconomic processes and our ability to explain regional differences in rates of growth and levels of development. RRI activities are both national and international in scope. Our area interests cover the globe, with a special focus on our own Appalachian region.

The Institute is committed to scholarship at its highest levels. We have a core of regional science research faculty within the Institute, dozens of Faculty Research Associates across campus representing twelve departments and five colleges, an extensive network of scholars throughout the United States and abroad, and an outstanding group of graduate students. Our goal is to create learning opportunities and to provide research support for those engaged in regional research, and to bring together scholars from across campus and around the world to create an intellectually rich environment for the conduct of regional research. We sponsor seminars, workshops, and conferences, providing a forum for exchanging ideas and discussing regional development research and issues.

The Web Book of Regional Science, which can be accessed via the Institute’s web site, is a valuable learning resource used world-wide by teachers and professionals alike. Providing both instructional and research reference materials, the RRI web site ranks highly on all search engines which translates to exceedingly wide dissemination of research results. We urge you to consider including the RRI as an institutional collaborator on research projects to enhance your ability to disseminate results to a wider audience of students, educators, and economic development practitioners from across the nation and indeed, around the world.

We invite you to browse our web site, and to contact us to explore the possibilities of becoming a member of our regional research community.
We offer the interdisciplinary PhD in Resource Management and Sustainable Development which consists of four different majors:

- Natural Resource Economics
- Resource Management
- Extension Education
- Human and Community Development

Graduates of our program found employment with the World Bank’s Young Professionals Program, in the Office of the Chief Economist of the USDA, as faculty members at other universities in the United States and around the world, as researchers at think tanks, and as members of government agencies.
