Conference Program 2011

Golden Anniversary

Welcome to SRSA's Golden Anniversary

We have an exciting program for our 2011 meeting in New Orleans. This year we convene to celebrate our half-century of annual meetings.

Please note that there may have been some changes since you last viewed the preliminary program posted on our website. Verify the timing, as well as the locations, of your papers and sessions. The author index located on pages 17-19 shows when and where you are scheduled.

The following provides a guide to the etiquette for all sessions:

- Each paper presentation is allotted twenty minutes, with an additional ten minutes of discussion.
- Discussants should prepare five minutes of remarks, allowing five minutes for questions and comments from other attendees.
- Session chairs and presenters should arrive ten minutes early for audio/visual preparation.
- We encourage each participant to bring a laptop computer to the session.
- Chairs: the order of the session is to be preserved to facilitate attendees who may be attempting to hear papers in concurrent sessions.
- Presenters and discussants should remain for the entire session.

The Regional Research Institute at West Virginia University

The Regional Research Institute at West Virginia University conducts and promotes interdisciplinary research on the economic and social development of lagging regions. As a center of regional research excellence for nearly five decades, the RRI is an internationally recognized center for the advancement of regional science.

Our research focuses on theories and history of regional development, methods for studying regions, and policies for stimulating their development. We seek to advance our understanding of socioeconomic processes and our ability to explain regional differences in rates of growth and levels of development. RRI activities are both national and international in scope. Our research interests span the globe, with a special focus on our own Appalachian region.

The Institute is committed to scholarship at its highest levels. We have a core of regional science research faculty within the Institute, dozens of Faculty Research Associates across campus representing twelve departments and five colleges, an extensive network of scholars throughout the United States and abroad, and an outstanding group of graduate students. Our goals are to create learning opportunities and to provide research support for those engaged in regional research. We bring together scholars from across campus and around the world to create an intellectually rich environment for the conduct of regional research, and we sponsor seminars, workshops, and conferences, providing a forum for exchanging ideas and discussing regional development research and issues.

The Web Book of Regional Science, which can be accessed via the Institute's website, is a valuable learning resource used worldwide by teachers and professionals alike. Providing both instructional and research reference materials, the RRI website ranks highly on all search engines, which translates to exceedingly wide dissemination of research results.

With two of the leading experts in spatial econometrics on our staff, we welcome and encourage inter-institutional research collaborations. We invite you to browse our website and to contact us to explore the possibilities of becoming a member of our regional research community.

West Virginia University is an Equal Opportunity/Affirmative Action Institution. West Virginia University is governed by the West Virginia University Board of Governors and the West Virginia Higher Education Policy Commission.

Historical Cost of Living Data Available from C2ER

The Council for Community and Economic Research compiles price data on more than 60 goods and services from over 300 urban areas. Published since 1968, the ACCRA Cost of Living Index is the most consistent source of city-to-city comparisons of key consumer costs available anywhere. Usually available in quarterly publications, these data are now available to academics and researchers in one historical dataset representing quarterly data from 1990.

Included are:

- Data analysis for cross sectional, time series, or panel data
- Data available for approximately 300 metropolitan statistical areas
- Data available on a quarterly basis since 1990
- Data organized in six component categories (food, housing, utilities, transportation, health care, and miscellaneous goods and services)
- Data available as quarterly average prices and indexed to a national average
- Available in Excel format
- Participating areas updated based on 2008 metro definitions from the Census Bureau
- Methodology is recognized by the Census Bureau, Bureau of Labor Statistics, President's Council of Economic Advisors, and Brookings Institution
- Sited by national media such as CNN, Forbes, MSN Money, Wall Street Journal

Academic researchers and their institutions can have this dataset for only \$750. This is a substantial savings over both the individual prices for our quarterly data and our normal price for the historical dataset.

For more information, please visit our website (www.coli.org) or call Dean Frutiger at 703-522-4980 (ext. 1021) to take advantage of this offer or to see sample data.

Louisiana Center for Rural Initiatives

The Louisiana Center for Rural Initiatives (LCRI) is a collaboration between the LSU and Southern University Agricultural Centers to provide research-based educational programs to create economic opportunities for rural communities in Louisiana. The mission of the LCRI is to improve the socioeconomic well-being in rural communities by: (1) providing leadership that assures focused, applied rural development research and community outreach; (2) increasing awareness and understanding of rural development conditions, issues, strategies and policies in Louisiana, and (3) providing rural community stakeholders and policy makers with information necessary for public-policy decision making.

LCRI faculty conduct rural development research and extension activities in Regional Economic and Community Analysis, Broadband Technology Education, Entrepreneurship, Leadership and Civic Engagement, and Health Care Delivery.

SCRA is a global leader in applied research and commercialization services with its headquarters in South Carolina. SCRA has a dual mission:

- **Delivering technology solutions to complex challenges** - SCRA affiliate Advanced Technology International (ATI) leads applied research collaborations that develop technologies to improve the mission effectiveness of Federal agencies and the business execution of Corporations. Learn more at www.ati.org.
- **Advancing the Knowledge Economy** - SCRA affiliate SC Launch is an economic development program that helps early-stage companies commercialize innovations and create jobs. Learn more at www.sclaunch.org.

In support of both missions, SCRA builds and manages research facilities that include wet labs, secure rooms for sensitive work and advanced, high-tech manufacturing shops.
